PLAYGROUND  
LOOP XL

## PlayPro™ natural rubber impact protection ring

- ✓ Smooth transition to EPDM surface or artificial turf
- ✓ Optimal and durable protection to the trampoline's inner edge (shock absorbing)

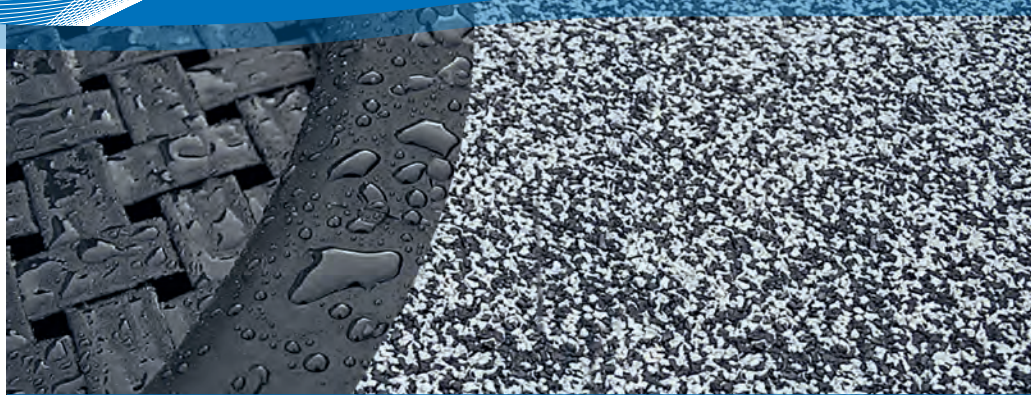

PLAYPRO™

EUROTRAMP.

Robust and durable, **PlayPro™** is particularly suitable for heavy-duty trampolines.

The **PlayPro™** impact protection ring made of non-slip natural rubber serves as edge protection and creates a smooth transition between the trampoline and the surrounding ground covering, e.g. to EPDM surface or artificial turf.

**PlayPro™** is glued to the trampoline frame before the surrounding ground covering is applied.

**PlayPro™** was developed by Rampline in cooperation with Eurotramp and meets the requirements of DIN EN 1176.

**Eurotramp Kids Tramps.**  
Awarded several times:

besonders  
entwicklungsfördernd  
Ein Qualitätsiegel der Bundesarbeitsgemeinschaft für  
Förderung und Bewegungsförderung e. V.

Suitable for playgrounds  
according to DIN EN 1176
