

Instructions built-in frame Sport-Thieme® Adventure-Tramp

Measures and weight

- 200 x 300 x 60 cm, hot-dip galvanized steel
- 2 mm material thickness
- Total weight: 20 kg

Required material

- Rubber mallet (not in scope of delivery)
- 13 mm open-end wrench (not in scope of delivery)
- 4x Turnbuckles
- 32x screws and 32x nuts
- 4x Frame parts
- 6x Self-adhesive foam rubber sheets

- Connect frame parts.

- Place the foam rubber sheets. Fits closely. Avoids metallic noise.

- Grip chains (Spring and turnbuckle are sharing one lug).
